

SCJ Alliance Hires Engineer to Serve Growing Client Base

LACEY, WA, October 17, 2014 – SCJ Alliance is pleased to announce the addition of engineer Jason Bruhn to our Lacey office. SCJ is consulting firm specializing in transportation planning and design, civil engineering, land use/environmental planning, and landscape architecture and design.

Jason's been working in the transportation and civil engineering field for twenty-one years. His experience includes hydraulic and stormwater engineering, site sewer and water systems, transportation engineering, roadway and sidewalk access design, and site grading plans. He is a graduate of the Hal and Inge Marcus School of Engineering at Saint Martin's University (SMU).

For ten years, Jason has been the Thurston County coordinator for the MATHCOUNTS competition. "The students are so smart," shares Jason with enthusiasm about the 6-8th graders that participate. "It's amazing how fast they answer the questions." Individuals and teams who excel at the local level compete at the state level, and state standouts move on to nationals. Jason got involved with the MATHCOUNTS through the National Society for Professional Engineers. "People can get more information about the program at mathcounts.org," shares Jason.

Since its founding in 2006 as Shea Carr Jewell, SCJ has grown steadily from three employees in one location, to nearly 60 employees in six locations across three states – Lacey, Seattle, Vancouver and Wenatchee, WA; Boise, ID; and Westminster, CO. For the fourth time in five years, SCJ Alliance was recently named one of the fastest growing engineering and planning firms in the nation, earning a place on the *ZweigWhite Letter* Hot Firm List for 2014.
