

**For Immediate Release**

## **Settle in Seattle? Not for This Engineer; Wenatchee Wins Him Over**

WENATCHEE, Wash. Jan. 18, 2018 – Over the past ten years, civil engineer Jake Lewing has completed design work for Seattle’s 520 floating bridge and multiple projects along I-5. But high-traffic projects mean high-traffic living, and this new father opted out.

Jake relocated to Wenatchee and joined SCJ Alliance, a consulting firm specializing in civil engineering, transportation planning and design, environmental and urban planning, landscape architecture and design, and public outreach.

“Wenatchee is where we want to be,” he explained. “My wife’s whole family lives here, and I’m really enjoying my new five-minute commute!”

Jake specializes in transportation engineering, particularly in roadway design, construction staging, specifications, and cost-effective solutions.

“Bringing Jake on board has been a real attribute to our office,” SCJ Engineering Manager Dan Ireland said. “He brings fresh new perspectives from his experience and has a keen eye for constructability reviews. It is going to be fun exposing Jake to the regional site development, streetscape, and recreational projects that we are currently working on in the Valley.”

Since its founding eleven years ago, SCJ has grown steadily to a dynamic team of more than 80 employees in six locations across Washington. The firm has been nationally recognized multiple times for growth, award-winning projects, and as a great place to work. In addition to Wenatchee, SCJ has offices in Lacey, Centralia, Seattle, Ballard and Vancouver.
